

# We're learning about Autism. One step at a time.

## Help us learn about this disorder and possible treatments by joining our clinical research study.

You may be able to take part in this study if you:

- Are a man aged 18-45 years with a diagnosis of autism spectrum disorder
- Speak and read English
- Have a caregiver willing to help you complete study activities and answer questions from clinic staff.

The VANILLA study will measure the effects of an investigational drug on social behavior, communication and safety.

## Contact us to learn more about the study.
