

Does your child have a Neurodevelopmental Disability and experienced problems getting to sleep or staying asleep at night for the last 3 months or more?

If your answer is yes and your child is aged between 2 and 17.5 years, your child may be eligible to take part in a clinical research study.

A Randomized, Placebo-Controlled Study To Investigate The Efficacy And Safety Of Circadin® To Alleviate Sleep Disturbances In Children With Neurodevelopmental Disabilities

The study is aiming to find out whether the drug Melatonin (**Circadin®**) improves children's sleep patterns.

If your child is eligible and you and your child agreed to take part, both of you would need to visit the clinic 10 times over a period of 2 years.

The study does not include any blood samples.

The Sponsor of this study is Neurim Pharmaceuticals.
