

Research Opportunity

Ages 3 months - 14 months

Are you interested in learning more about your child's development?

You can help researchers at the Center for Autism and Related Disorders (CARD) identify early signs of healthy and delayed development so that children may reach their full potential

Your child may qualify if he/she
Was born preterm
and
Has no family history of Autism Spectrum Disorder (ASD)

What is the study about?

- Understanding typical social and communication growth in the first 3 years of life
- Identifying early signs of ASD and other developmental delays

What is involved?

- Assessments of your child's development from 3-36 months of age
- Playful and structured activities
- Questionnaires about your child and you
