

# Are You/Your Child Still Struggling with Schizophrenia?

## Join a Clinical Research Study

For adolescents 12 to 16 years old diagnosed with schizophrenia

- Seven visits conveniently scheduled at Kennedy Krieger Institute over 10 weeks
- Each visit lasts from 2 to 3 hours
- There is compensation for time and travel for each visit

The purpose of the study is to determine if study drug Na-Ben (sodium benzoate), added on to existing treatment, is safe and effective.
