

## RESEARCH STUDY: Adult healthy volunteers needed

We are looking for healthy volunteers for structural and functional Magnetic Resonance Imaging scans of the brain and spinal cord

- WHO:** Healthy adults volunteers, age 18-65.
- WHAT:** Structural and functional Magnetic Resonance Imaging (sMRI and fMRI) of the brain and spinal cord. We will ask you to lie still in the MRI while we take pictures of your brain and spinal cord. We will also ask you to stay awake during the length of the scan, during which you will pay attention to a vibration on your skin (two locations on the upper body, two locations on the lower body).  
**The imaging will be performed over a single visit, single session, and will last 60 to 90 minutes.**  
Participants will be reimbursed a total of \$30 in the form of a gift card, if the study is completed.
- RISKS:** The effects of magnetic fields in an MRI scanner have been extensively studied, and there are no known significant risks with an MRI exam.
- BENEFITS:** There is no direct benefit to you from being in this study. This study may benefit others in the future by improving methods for the study of nervous system structure and function.
- WHERE:** The International Center for Spinal Cord Injury at Kennedy Krieger Institute  
707 North Broadway, Baltimore, MD
- CONTACT:** Research Coordinator at the International Center for Spinal Cord Injury; (443) 923-9235 or [clinicaltrials@spinalcordrecovery.org](mailto:clinicaltrials@spinalcordrecovery.org)

Principal Investigator: Ann S. Choe, PhD  
IRB protocol: IRB00070570  
Ver/Date: 1.0/5.27.2015

**Do not use this form unless the Johns Hopkins Medicine Logo appears here.**

**Approved July 2, 2015**
