

# Project HEAL Services Logic Model

## Context/Situation

There are 104,136 children with disabilities ages three through 21 who receive special education and related services in Maryland public schools. Families raising children with disabilities often need advocacy and legal services to help them navigate the complex special education system.

### Inputs

- Funding
- Staff and trainees
- Pro bono attorneys
- Corporate and law firm partners
- Technology
- Office space

### Activities

- Obtain client intakes
- Provide civil legal services to clients
- Provide limited representations to clients
- Provide case consultations to Kennedy Krieger faculty, staff, and trainees
- Provide professional and community trainings to raise awareness about public health, medical-legal partnerships, and substantive legal issues affecting individuals with disabilities

### Outputs

- Client intakes obtained
- Civil legal services received by clients
- Limited representations received by clients
- Case consultations received by Kennedy Krieger faculty, staff, and trainees
- Professionals and community members aware of public health, medical-legal partnerships, and substantive legal issues affecting individuals with disabilities

### Outcomes

- Increased number of target population receiving civil legal services
- Increased number of target population receiving limited representations
- Increased number of Kennedy Krieger faculty, staff, and trainees receiving case consultations
- Increased number of professionals and community members aware of public health, medical-legal partnerships, and substantive legal issues affecting individuals with disabilities

### Impact

- Increased number of students with disabilities receiving appropriate educational programs and placements in the state of Maryland
- Increased number of professionals and community members aware and knowledgeable about public health, medical-legal partnerships, and substantive legal issues affecting individuals with disabilities
