

# Limb Differences Clinic at Kennedy Krieger Institute

## Who We Are

The Limb Differences Clinic at Kennedy Krieger Institute is committed to meeting the unique needs of children and adolescents who are missing part or all of a limb or limbs. We provide high-quality, comprehensive medical care that focuses on improving the health and maximizing the functioning of our patients. Through our interdisciplinary approach, we work to help children and adolescents with limb differences become active and pain-free, so they may lead healthy and fulfilling lives.

## Who We Serve

We provide treatment and care for children and adolescents with congenital (present at birth), postsurgical or trauma-related limb differences and amputations, including:

- Congenital deficiencies (short or missing bones from birth):
  - Proximal femoral focal deficiency
  - Tibial and fibular hemimelias
  - Amelia
- Leg length differences
- Amputations and deformities from trauma or infection
- Clubfoot
- Osteogenesis imperfecta

## Our Team

Our clinic is staffed by an interdisciplinary team of professionals trained to provide the complex care needed for children who have limb differences. Our team includes experts from the following fields:

- Pediatric rehabilitation medicine
- Orthopedic surgery
- Occupational therapy
- Physical therapy
- Prosthetics, including 3D printed prosthetics
- Behavioral psychology

Depending on the needs of the patient, consultation with other specialists in fields such as social work can be provided. We also welcome the participation of our clients' other care providers in the assessment and development of the treatment plan.

## Our Treatment Approach

Each patient receives a comprehensive evaluation, treatment recommendations and follow-up from our interdisciplinary team. Depending on the child's needs, clinic visits typically last between 30 minutes and two hours, and may include formal therapy evaluations or treatment sessions. We will discuss nonsurgical treatment options that could include:

- Physical and occupational therapies
- Prosthetics and orthotics
- Rehabilitation

Limb lengthening, reconstructive surgery and straightening bones are some of the surgical options we offer.

In addition to addressing a child's prosthetic, therapeutic and surgical needs, the treatment team also addresses issues such as the child's emotional well-being, preparation for school, participation in sports, and technology and equipment needs.

Kennedy Krieger Institute recognizes and respects the rights of employees, trainees, and patients and students, and their families. At Kennedy Krieger, we ground our care, services, training and research in treating others with respect and civility. We respect the cultural identity of every person. Kennedy Krieger does not discriminate against people based on, but not limited to, perceived or actual race, color, ethnicity, national origin, age, language spoken, accent, marital status, veteran or military status, immigration status, disability, religion, pregnancy status, sex, sexual orientation, or gender identity or expression. We strive for equitable care for all individuals for whom we provide services, training, education and research participation. We encourage employees, trainees, and patients and students, and their families, to become active partners in the services provided by asking questions, seeking resources and advocating for their needs. © 2021 Kennedy Krieger Institute 11/2021
